

**Profile:**

Computacenter is a leading independent provider of IT infrastructure services, enabling users and their business in a digital world. We advise organisations on IT strategy, implement the most appropriate technology, optimise its performance, and manage our customers' infrastructures. In doing this we help CIOs and IT departments in enterprise and corporate organisations maximise productivity and the business value of IT for internal and external users.

Computacenter provides user support, supply chain management, and secure provision of applications and data to support individual working styles and improve collaboration. To achieve this, we assist with consulting as well as the implementation and operation of networks and datacenter infrastructures on or off customers' premises and in the cloud.

Computacenter combines global reach with local expertise. We operate Infrastructure Operations Centers and Group Service Desks across Europe, South Africa, Asia and the Americas from which our employees provide user support in 30 languages. Customers with global requirements are served through an extensive international partner network, which mirrors the requirements of our European-headquartered client base.
