

Profile:

At BT, we're more than just a broadband company. Millions of people rely on our services every day without realising. The NHS, emergency services, air traffic control, contactless payments in shops and banks – they'd all grind to a halt without our services, technology and innovations. Oh, and we don't just do this in the UK; we do it in 180 countries around the world. We're not an ordinary business, and we don't do ordinary apprenticeships. We're here to create the next big thing in technology and we want to take you on our journey with us.

Apprenticeship Opportunities:

Students can register their interest at the moment and will be notified when we go live with our new roles (we've only got vacancies in Northern Ireland left currently).
