

The Royal Veterinary College (RVC), University of London is one of the world's leading veterinary and biological science institutions, renowned for pioneering approaches to teaching, research and cutting edge clinical provision. Founded in 1791, the RVC was the first veterinary institution in the English speaking world and the driving force behind the establishment of the profession in the UK.

Based over two campuses, its Camden Campus (London) offers the buzz of being based in the heart of the nation's capital; while in contrast, its Hawkshead Campus (Hertfordshire) offers a more rural experience on a 575 acre site in the English countryside. Both campuses offer its 2,500 students a friendly, supportive environment with state-of-the-art facilities.

**Profile:**

The RVC is currently ranked as the #1 Veterinary School in Europe. With our Veterinary Medicine courses being one of the few veterinary schools in the world that hold accreditations from the Royal College of Veterinary Surgeons (RCVS) in the UK, the European Association of Establishments for Veterinary Education (EAEVE) in the EU, and the Council on Education of the American Veterinary Medical Association (AVMA) in the USA and Canada. Furthermore, RCVS accreditation ensures RVC veterinary graduates are licensed to work in Ireland, Australia and New Zealand, as well as South Africa. In the case of our nursing courses, we are accredited in the UK by the RCVS and in the EU by the Accreditation Committee for Veterinary Nursing Education (ACOVENE), and our biological science programme is accredited by the Royal Society of Biology.

It is the UK's largest and only independent specialist.
