

Our School Matron (former RSCN/RGN) plays a crucial role in supporting the health and well-being of students and staff. She is responsible for the day to day treatment of any injuries sustained at school and the ongoing management of medication for any students with a medical condition. She is responsible for meeting the needs of children should they become unwell or develop health related issues that impact on their happiness and ability to perform in school. Matron works in collaboration with teachers, parents and school administrators to ensure that students health needs are being met.
