

June 2026

Dear Parents and Carers

Year 12 Brain Day -Wednesday 8 and Thursday 9 July 2026

In order to complement the A Level Psychology and Biology courses at Parmiter's, we have arranged for Dr Guy Sutton of Medical Biology Interactive to host an interactive study day for students on the topic of the brain. The sessions will be arranged over two separate days, with each day including slightly different topics. **The sessions will run from 9.00am – 3.20pm each day.**

Wednesday will have a Biology focus, whilst Thursday will have more of a Psychology focus.

During their A Level courses students learn about the different aspects of the brain, but this is often a snapshot of information which lacks the detail and context this workshop will provide. Dr Sutton will use presentations and the dissection of a sheep brain to help explain the complex functioning of the brain.

We will be offering this experience with a choice of two days and students should only select **ONE day**, which is particularly relevant to students studying Biology and Psychology. **Places are limited to 25 students per day and will be allocated on a first come, first served basis.**

The cost of each full day workshop is £28.00. Please make your payment via [WisePay](#) (under Tickets and Events) by selecting the day on which your child would like to attend. Once payment has been made via WisePay, please complete [this form](#) by **no later than Friday 19 June 2026.**

Yours sincerely

Mrs S Renton
Head of Psychology
