Dear Parents and Carers

Design & Technology in Year 9

The Design & Technology curriculum in Year 9 enables students to design and make a wide variety of products from a range of materials. Students will be working with wood, plastic, textiles, food and graphic products.

To meet the increasing cost of the raw materials needed to make high quality products, the school asks for a voluntary contribution of **£25** per student. This contribution will cover the cost of the materials required for all projects, except those undertaken in Food lessons. Students in Food Technology will be asked to bring in most of the ingredients they will require for their practical lessons.

During the course of the year, students will explore three projects, which will be covered by the **£25.00** contribution. Please make your payment via [WisePay](#) (under Shop) by **Friday 2 October**.

Thank you in advance for your continued support in enhancing our students' education.

Yours sincerely

Mrs N Fielding
Head of Design & Technology
