

Curriculum

Students at Parmiter's experience a curriculum which contributes to a well-balanced education, developing the abilities and skills of individuals so that they take a valuable, positive and active place in society. The curriculum meets the needs of each student, regardless of gender, race, religion, sexuality or disability. Our primary aim is for each Parmiterian to be self-assured and caring, an active and well-rounded citizen with integrity, who respects others and contributes to society.

The curriculum demonstrates breadth, balance, cohesion and relevance. It is delivered through a variety of appropriate learning and teaching styles which create conditions for effective learning. This includes provision for students with specific needs and differentiated tasks for more able students. We equip each student to make informed and realistic decisions at each stage in their school career.

Confidence and fluency in numeracy, language and literacy are recognised as essential foundations for success in all subjects. As well as dedicated teaching, mathematical fluency and spoken language, reading, writing and vocabulary, are developed in all relevant lessons.

Assessment and feedback are a key part of the curriculum. Summative assessment includes internal and external tests, and teacher-assessed class and coursework. There is regular communication with parents through a reporting system, including a Parents' Evening, for each year group. Formative assessment is more diverse: it includes written feedback from teachers but it also covers verbal feedback, peer and self-assessment. Further details can be found in the school's Teaching & Learning Policy, Assessment, Recording and Reporting section.

Curriculum at Key Stage 3

In Years 7 to 9, all students follow a curriculum designed to develop essential skills and knowledge in a broad range of subjects. Each department offers a relevant, balanced and differentiated curriculum that has regard to the National Curriculum. The curriculum model for the current academic year is included as an appendix to this policy; this indicates whether students are taught in mixed ability groupings or sets based on academic performance.

In Years 7 to 9 all students follow a Life Skills programme; this covers a variety of topics including PSHE (personal, social, health and economic education), Citizenship, Careers, Financial awareness and a Resilience programme designed to promote realistic thinking, adaptive coping and social problem-solving skills. The programme is supported by valuable visits from outside agencies. Sex and relationship education is delivered through the Science curriculum and the Life Skills programme.

It is expected that all students will follow a full curriculum at Key Stage 3. Exceptions to this are rare and only in circumstances where a student requires support and/or adaptation because of a diagnosed specific learning need or a serious medical condition.

More detailed information about the current Key Stage 3 curriculum and course outlines for current cohorts are all available on the school website.

Curriculum at GCSE (Key Stage 4)

In Years 10 & 11, students follow a curriculum designed to prepare them for GCSE examinations and post-16 opportunities. The curriculum includes compulsory (core) and optional elements. Parmiter's is committed to offering a broad range of optional GCSE subjects so students can pursue their areas of interest. The curriculum model for the current academic year is included as an appendix to this policy; this indicates whether students are taught in mixed ability groupings or sets based on academic performance.

From September 2019, the core examined subjects are: English Language; English Literature; Mathematics; the Sciences and a Modern Foreign Language.

Students starting Key Stage 4 in September 2019 (and subsequent cohorts) will follow a non-examined programme of Life Skills and Religious Education in Years 10 & 11, this course is called RESPECT (Religious, Social, Personal and Cultural Studies). This is delivered through a fortnightly lesson, supported by visiting speakers and workshops. The Life Skills course is designed to prepare students for the opportunities, responsibilities and experiences of adult life. It includes provision for sex and relationship education (further supported by the Science curriculum), careers education and citizenship as well as aspects of health education and social responsibility. The Religious Education programme is designed to develop a knowledge and understanding of the religions and beliefs which form part of contemporary society. Students will also explore a range of moral and philosophical questions.

All students participate in four Games lessons per fortnight.

Detailed guidance is offered to students and parents in order to ensure each student follows an appropriate curriculum. It is expected that all students will follow a full curriculum to GCSE. Exceptions to this are rare and only in circumstances where a student requires support and/or adaptation because of a diagnosed specific learning need or a serious medical condition. The study of additional GCSE / A Level qualification(s) outside of the school curriculum is not considered grounds for reducing a student's curriculum.

In contrast to some schools, we do not currently prescribe that all students study the suite of subjects required to fulfil the EBacc or the Attainment 8 criteria. However, students and parents who do wish to will see that it is easily possible within the Key Stage 4 curriculum.

More detailed information about the current Key Stage 4 curriculum, the GCSE options process and course outlines for current cohorts are all available on the school website.

Curriculum in the Sixth Form (Key Stage 5)

Parmiter's is committed to offering an extensive academic Sixth Form curriculum. All A Level subjects are taught as two year linear courses. All students are required to study at least three subjects to A Level at Parmiter's. To study four subjects to A Level, a student will have an exceptional set of GCSE results (details of specific criteria are available on the school website).

Those studying A Level Further Mathematics (and hence also A Level Mathematics) are expected to take two further subjects in Year 12. In Year 13, it may be possible for students to study only Mathematics, Further Mathematics and one further subject. This decision must be agreed by the Heads of Sixth Form and the teacher in charge of KS5 Mathematics. Requests will only be considered at the end of Year 12. This programme of study would only be suitable for students wishing to pursue a degree with a mathematical focus and where their performance throughout Year 12 (including in end of year examinations) indicates they are on track to achieve grades in Mathematics and Further Mathematics that are at least in line with ALIS expectations.

All students attend a programme of Study Skills sessions during the first half of Year 12 and have the opportunity to take the Extended Project Qualification (EPQ) to further pursue a particular area of interest.

In Year 12, all students attend a weekly Liberal Studies session. As well as guidance on careers education and personal well-being (including sex and relationship education), a wide range of outside speakers introduce students to a variety of political, moral and social issues. In Year 13, all students attend a fortnightly pastoral period, providing further guidance on careers and higher education and preparing them for life after Parmiter's.

More detailed information about the current Key Stage 5 curriculum, and course outlines for current cohorts are all available on the school website and in the appendix to this document.

Beyond the Curriculum

The school provides a wide range of opportunities beyond the classroom. Extra-curricular activities enrich a student's experience and are an integral feature of the school's ethos. These include subject-enhancement activities, clubs and societies, visits and exchanges, community service, and a host of sporting, cultural, musical, house-based, public-speaking and dramatic experiences. Leadership opportunities are available to students in all year groups at form group, year group and whole school level.

There are a number of other policies / documents that should be considered alongside this document in order to obtain a broader understanding of our curriculum package.

These are:

- Teaching & Learning policy, that includes sections on:
 - Teaching & Learning - general principles
 - Assessment, Recording and Reporting
 - Homework
 - Stretch and Challenge
- Sex and Relationship Education Policy
- Spiritual, Moral, Social, Cultural Development, Collective Worship & Promotion of British Values Policy
- Careers Education and Guidance Policy (includes work experience, work related learning and enterprise education)
- Special Educational Needs Policy

Appendix – Curriculum model for the current academic year (2019/20)

Years 7, 8 & 9

Subject	Number of 1 hours lessons per fortnight		
	Year 7	Year 8	Year 9
English	5	5	6
Literacy	1	0	0
Great Big Read	2	1	0
Mathematics	6	6*	6*
Science	6	6	6**\$
French	5	4**	3*
German/Spanish	0	4#	4*
Geography	3	3	3
History	3	3	3
Design & Technology	3#	3#	4#
Music	3	2	2
Religious Studies	2	2	2
Art	3	2	2
Drama	2	2	2
Computer Science	1	2	2
PE	4#	4#	4#
Life Skills	1	1	1

Unless indicated, students in Years 7, 8 & 9 are taught in mixed ability form groups.

* indicates that students are taught in sets based on academic performance.

** indicates that students are taught in more broadly banded sets based on academic performance (e.g. sets 1a, 1b, 2a, 2b).

indicates students are taught in mixed ability groups that are different to their form groups.

\$ In Year 9, Science lessons are timetabled as discrete Biology, Chemistry and Physics lessons.

Years 10 & 11

	Number of 1 hours lessons per fortnight	
	Year 10	Year 11
English	7	7
Mathematics	6*	6*
Science	12*	12*
Modern Foreign Language option (French, German or Spanish)	5*	5*
Option subject 1	5	5
Option subject 2	5	5
Option subject 3	5	5
RESPECT (non-examined)	1	1
Games (non-examined)	4	4

Unless indicated, students in Years 10 & 11 are taught in mixed ability groups that are different to their form groups.

* indicates that students are taught in sets based on academic performance.

GCSE subjects offered^s to the current Year 10 and/or 11: Art & Design, Chemistry, Biology, Computer Science, Business, Design & Technology, Drama, Economics, English Language, English Literature, Food Preparation & Nutrition, French, Geography, German, History, Mathematics, Music, Physical Education, Physics, Religious Studies, Combined Science (Double Award), Spanish.

Years 12 & 13

The curriculum is structured into 4 A Level subject blocks (blocks A, B, C, D), with additional blocks for Liberal Studies/Pastoral period and Study Skills / EPQ.

For the current academic year, all A Level subjects are timetabled for between 8 and 10 hours per fortnight. The timetable allocation is determined by the demands of the A Level course, the availability of specialist staff and / or the teaching group size.

	Number of 1 hours lessons per fortnight	
	Year 12	Year 13
Option block A	8-10	8-10
Option block B	8-10	8-10
Option block C	8-10	8-10
Option block D	8-10	8-10
Liberal Studies / Pastoral Period	2	1
Study Skills / EPQ / Pastoral Period	1	0

All subjects are taught in mixed ability groups; there is no academic setting.

A Level subjects offered^s to the current Year 12 and/or 13: Art, Biology, Chemistry, Computer Science, Design & Technology: Product Design, Drama & Theatre Studies, Economics, English Literature, French, Further Mathematics, Geography, German, History, Mathematics, Music, Photography, Physical Education, Physics, Politics, Psychology, Religious Studies, Sociology, Spanish.

\$ The subjects offered will only run if there is sufficient demand from students. The school cannot guarantee that every subject will run each academic year.

Admission on to GCSE and A Level courses

Students will only be admitted on to a GCSE course or A Level course if they meet all published entry criteria for that course and there are spaces available on it. Where subjects are oversubscribed, the school will explain to parents and students the criteria used to admit students to the course.

Where students are taught in mixed ability groups, group sizes are limited to ensure a positive teaching and learning experience.

At GCSE, these are:

- 28 students for subjects taught using standard classroom facilities.
- 22 students for subjects requiring space-limited specialist teaching facilities.

At A Level, these are:

- 24 students for subjects taught using standard classroom facilities.
- 20 students for subjects requiring space-limited specialist teaching facilities.
